Metropolis Evo

LA NOSTRA STORIA

Dare una svolta ai propri schemi è sempre stato alla base della filosofia di Tisettanta.

Da questa visione, unita alla collaborazione con il designer Antonio Citterio, nasce nel 1985 Metropolis.

Frutto di un processo industriale all'avanguardia, questo sistema rivoluzionò completamente il mondo dell'arredamento introducendo per la prima volta nella casa un mobile componibile a spalla portante.

Metropolis divenne presto icona della collezione Tsettanta e simbolo della libreria contemporanea.

Grazie all'attenzione posta da Tisettanta all'evoluzione del mondo dell'abitare e delle innovazioni tecnologiche, Metropolis ha subito nel tempo alcuni restyling mantenendo la sua caratteristica di prodotto all'avanguardia.

The revolution of its own schemes has always been the basis of Tisettanta's philosophy.

From this vision, coupled with the collaboration with designer Antonio Citterio, was born in 1985 Metropolis. The result of a cutting-edge industrial process, this system completely revolutionized the world of furnishings by introducing for the first time in the home a bookcase system.

Metropolis soon became the icon of the Tisettanta collection and symbol of the contemporary bookcase.

Thanks to Tisettanta's attention to the evolution of the world of living and technological innovations, Metropolis has undergone some restyling while retaining its cutting-edge product feature.

Metropolis Evo rappresenta l'ultima espressione del dinamismo di questo sistema, frutto della collaborazione di Tisettanta con Paolo Zanotto.

Metropolis Evo porta con sé una grande versatilità e possibilità di personalizzare la propria composizione, grazie all'utilizzo in piena libertà di piani e di reticolari, adattabili a qualsiasi ambiente, dimensione, creatività e fantasia, permettendo di aggiungere valore al proprio spazio abitativo. Il vetro con le sue qualità di leggerezza e trasparenza, consente di creare utili vani chiusi, senza però alterare la sensazione di apertura e di libertà che ogni composizione trasmette.

Metropolis Evo is the ultimate expression of the dynamism of this system, the result of Tisettanta's collaboration with Paolo Zanotto. Metropolis Evo brings with it a great versatility and the ability to customize its composition, thanks to the free use of shelves and flexible grids, adaptable to any environment, size, creativity and imagination, thus adding value to your living space. The glass with its lightness and transparency qualities allows you to create useful closed compartments without altering the feeling of openness and freedom that each composition transmits.
